

# MASTER THE FUTURE

**Master of Business Administration**  
MBA Program Collège des Ingénieurs Italia

A non-profit institution for post-graduate education, part of the European network of College des Ingenieurs (Paris, Munich & Turin), to develop managerial skills, entrepreneurship and value creation in future leaders.

We select the brightest talents among young graduates of science and economics with no more than two years of professional experience, ability to quickly acquire business knowledge and strong leadership skills.

Business Education for ten months, in which phases of learning-on-the-job are included at our partner companies and complemented with academic training in the classroom, by professors from top-ranked international business schools.

International  
FUTURE

Believe in the future, to invest in people who will make a difference: brilliant minds with innovative ideas and new approaches. Since 2009, the MBA program 'Collège des Ingénieurs Italia' has been proposed to the companies by 'Scuola di Alta Formazione al Management' as an unique opportunity in this particularly complex global business environment, especially in a country as "difficult" as ours, and to put it to good strategic use.

The MBA program Collège des Ingénieurs Italia prepares the 'managers of the future' in an international environment, by integrating "technical" training acquired during their university studies with a boost of Business Education based on managerial studies, ethics, innovation and value creation.

## THE ESSENTIALS

- Intensive 10-month MBA program
- 14 weeks of lectures and 26 weeks of "learning through action" in the company
- Highly selective and challenging international environment
- Participants hired as junior consultants for the duration of the program

### LENGTH

- 10 months
- 14 weeks of lectures
- 26 weeks of "learning through action" in the company
